

CKMbT International Pte Ltd's Commitment to Workplace Safety and Health

During the Workplace Safety and Health (WSH) Awards 2023, CKMbT International Pte Ltd (“CKMbT”) received the WSH Performance Award (Silver) for its commitment to high WSH standards. The company had demonstrated proactive initiatives to ensure good safety and health performance and systems.

Here are several of CKMbT’s notable WSH practices:

1. Strengthening WSH Ownership

CKMbT mandates project contractors to achieve bizSAFE STAR certification and ensures strict adherence to the Construction Safety Audit Scoring System (ConSASS) audits for ISO 45001 compliance. The company itself is bizSAFE STAR-certified and ISO 45001 ready. To ensure that its vendors uphold similarly high WSH standards, the company takes into consideration factors, such as vendors’ bizSAFE certification and Business Under Surveillance (BUS) programme status, as part of its contractor evaluation system.

2. Enhancing Focus on Workplace Health

CKMbT integrates a holistic approach to its WSH Management Systems from project inception, conducts regular audits and monitors key performance indicators. These efforts result in improved hazard management and productivity. To educate its workers and raise awareness about preventing occupational illnesses, CKMbT initiated a musculoskeletal disease prevention programme.

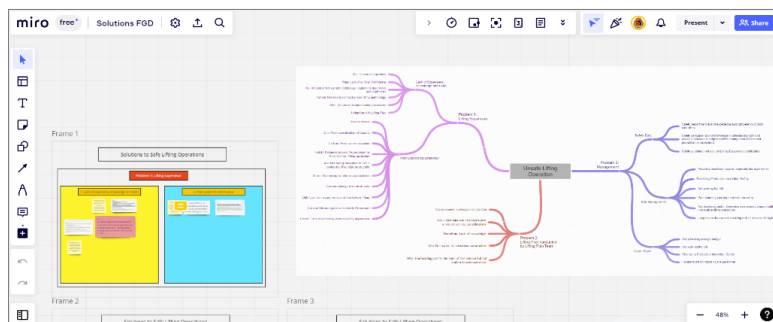

Bridge crossing for a safe means of traversing trenches

Monthly engagement and audits by top management

3. Promoting Technology-enabled WSH

Embracing technological advancements, CKMbT leverages drone technology for surveillance in hard-to-reach areas and Miro board technology to streamline lifting plans and safe lifting practices.

Stakeholders collaborated through Miro board technology to improve lifting plans and site safety

4. Applying Principles Outlined in the [Approved Code of Practice \(ACOP\) on Chief Executives' and Board of Directors' WSH Duties](#)

By closely adhering to the ACOP, CKMbT is dedicated to upholding the highest safety standards. The company commits to Specific, Measurable, Achievable, Relevant, and Time-sensitive (SMART) objectives and targets within its Occupational Health and Safety (OHS) policy, effectively communicated to staff via monthly WSH committee meetings chaired by its Managing Director. This hands-on approach allows for continuous monitoring and improvement of WSH performance. Additionally, WSH takes precedence in all management and board meetings, setting the tone for decisions related to productivity, cost, and time. Incident reporting is streamlined through a dedicated group, ensuring prompt reporting and comprehensive investigations to prevent recurrences. Lastly, to ensure everyone's competency in WSH knowledge, monthly WSH training is mandatory for all CKMbT management and personnel.

Monthly in-house trainings are conducted as a refresher on important topics and as a platform for feedback and discussion

These efforts reflected CKMbT's dedication to fostering a safe and healthy work environment for their employees, contractors, as well as partners.
