

# LOOK. THINK. DO.

Look out for danger. Think of how you can protect yourself. Do your work safely.

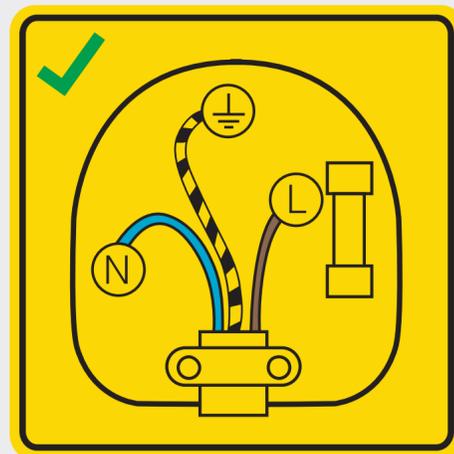

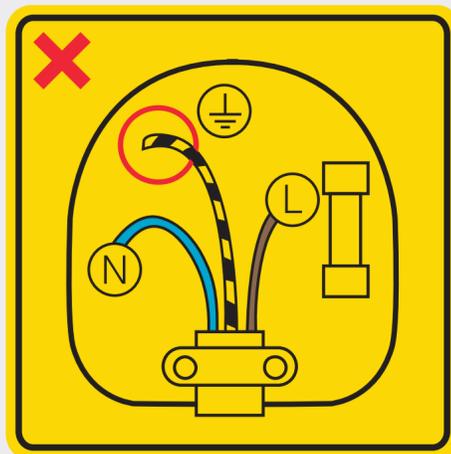

## 6 Basic Workplace Safety and Health (WSH) Rules for Use of Electrical Equipment

Overloading power points, improper earthing and wet surroundings can cause serious injuries and even death to workers. **Every year, 2 workers die and 23 workers are injured from exposure to electric current.** Do your risk assessment before starting work.

### Report to your supervisor if you feel unwell.

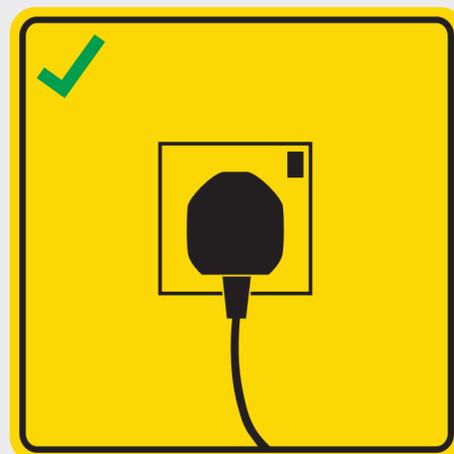

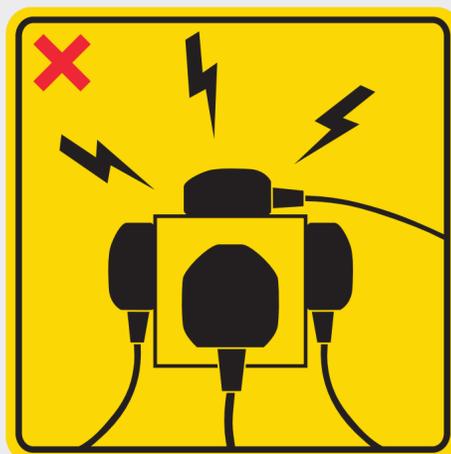

### Ensure correct wiring and proper earthing (⊥).\*

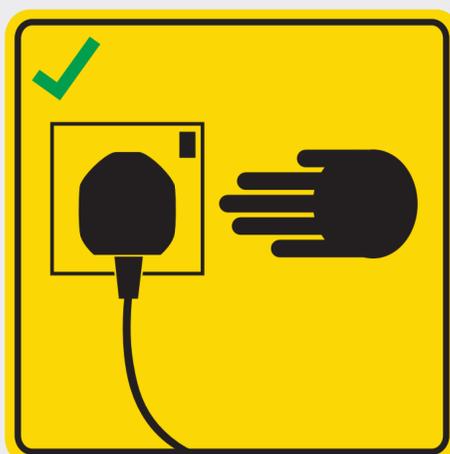

### Make sure equipment is in good condition before use.

### Do not overload power sockets.

### Dry your hands before touching equipment.

### Use the right personal protective equipment.
