

Prevent STFs at your premises

Slips, Trips and Falls (STFs) are more common than you think.

Slips, Trips, and Falls (STFs) harm your workers and operations

In a previous workplace incident, a crew member at a restaurant slipped and fell on a ramp that was slippery. She hit her forehead and her left arm when she fell. She was hospitalised and given medical leave for 26 days. As a result, another staff had to cover her duty.

You can play your part to prevent **slips, trips and fall incidents at your workplace!**

Share these STF prevention tips with your workers

Keep walkways clean and clutter-free, immediately clean up spills.

Always hold the handrail when going up or down the stairs.

Use caution when walking or working on wet or slippery surfaces.

Use proper ladder/ steps when accessing high areas, maintain three points of contact with a ladder at all times.

Use non-slip footwear and replace it when worn out.

Keep walkways well-lit and free of obstructions.

Encourage your workers to report safety hazards before it is too late:
