## Fall from Height Accident in Australia

- ▶ 14 August 2020
- ▶ **Apprentice** electrician; worked for ~ 3 mths
- ▶ **Carrying solar panel** weighed 18.5 kg
- ▶ Roof of single-storey house
- ▶ **Unsecured ladder** slipped out
- ▶ Fell at height of < 2.4 metres
- ▶ Head injury; no recollection of the incident

**Renewable power incentives**

**Solar PV panel rebate**

**Solar panel photovoltaic (PV) installations**

Solar panel photovoltaic (PV) systems (solar panels) generate electricity from sunlight. They are often placed on rooftops to capture as much energy from the sun as possible.

Solar panels are becoming increasingly popular in NSW, with a record number of installations in 2021. This trend, partly caused by several government incentives, also sparked a 25% increase in the number of accredited installation companies in 2021.

In 2021, SafeWork NSW inspectors visited 286 solar panel installation sites and found that the main risks with rooftop solar installation to be falls from heights and contact with electricity.

**Solar supervisor and workers**

## Fatal FFH Accident in the US

- ▶ ~3:45 p.m. on May 15, 2008
- ▶ Mill worker, Employee #1, at a seed storage, cleaning, and distribution facility
- ▶ Climbed a **7.6m** fixed ladder onto a shade roof and then to a catwalk
- ▶ ~9m to 12m high; there from **30 minutes to one hour**
- ▶ Air temperature was **37.8 Degree Celsius with very low humidity**
- ▶ Employee #1 started to **feel dizzy** and his coworker told him to sit down
- ▶ Employee #1 went to the other end of the catwalk and sat down in the shade
- ▶ Shortly thereafter, he was seen **hunched over at the top of the ladder**
- ▶ Later found at the bottom of the ladder
- ▶ Apparently **fallen from the catwalk or from the ladder**

© Copyright National University of Singapore. All Rights Reserved.

23

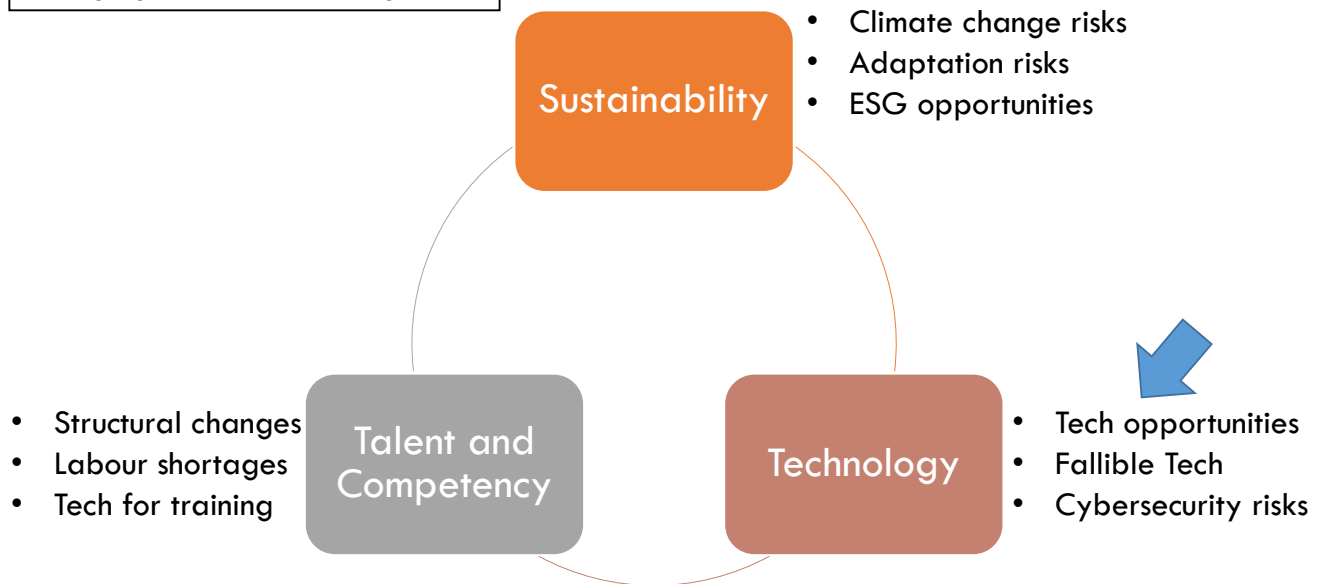

## List of Core ESG Metrics

Occupational Health & Safety	Fatalities	Number of cases	GRI 403-9, WEF core metrics, MOM (Singapore), SASB 320	Number of fatalities as a result of work-related injury during reporting period across the organisation. <u>Scope of report should include both employees and workers who are not employees but whose work and/or workplace is controlled by the organisation.</u>
	High-consequence injuries	Number of cases	GRI 403-9, WEF core metrics, MOM (Singapore)	Number of high-consequence work-related injuries (injury that results in a fatality from which the worker cannot recover fully to pre-injury health status within 6 months) excluding fatalities during reporting period. Scope of report should include both employees and workers who are not employees but whose work and/or workplace is controlled by the organisation.
	Recordable injuries	Number of cases	GRI 403-9, WEF core metrics, MOM (Singapore), SASB 320	Number of recordable work-related injuries during reporting period. Scope of report should include both employees and workers who are not employees but whose work and/or workplace is controlled by the organisation.
	Recordable work-related ill health cases	Number of cases	GRI 403-10, WEF expanded metrics, MOM (Singapore)	Number of recordable work-related illnesses or health conditions arising from exposure to hazards at work during reporting period. Scope of report should include both employees and workers who are not employees but whose work and/or workplace is controlled by the organisation.

Potential opportunity to improve WAH safety and health

## Emerging Trends Influencing WAH

**Volatile**  
**Uncertainty**  
**Complex**  
**Ambiguous**

- Structural changes
- Labour shortages

**Talent and Competency**

**Sustainability**

- Climate change risks
- Adaptation risks
- ESG opportunities

- Focus on circle of influence
- Multi-level risk assessments

**Technology**

- Tech opportunities
- Fallible Tech
- Cybersecurity risks

Charles Perrow's  
Normal Accident  
(1984)

Perrow argues that multiple and unexpected failures are built into society's **complex** and **tightly coupled systems**.

“Normal” accidents are **unavoidable** and **cannot be designed around**.

# High Reliability Organisations

- ▶ Preoccupation with failure – Proactive risk monitoring

- ▶ Reluctance to simplify – Avoid oversimplifying complex situations

- ▶ Sensitivity to operation – Attention to ops details and frontline workers

- ▶ Commitment to resilience – Build redundancy and preparedness

- ▶ Deference to expertise – Recognise expertise & cross-functional collaboration
