WORKPLACES' PREPAREDNESS FOR TERRORISM SCENARIOS, DISEASE OUTBREAKS, AND MENTAL WELL-BEING.

# SAMPLE CHANGES

## TERRORISM SCENARIOS, DISEASE OUTBREAKS, AND MENTAL WELL-BEING

### 4.2 Employer

**4.2.1** As defined in the WSH Act, an Employer is a person who, in the course of the person's trade, business, profession or undertaking, employs any person to do any work under a contract of service. The self-employed person or Principal shall also **fulfill** the duties and functions of an Employer specified in **this CPthe RMCP**.

**4.2.142.2** An Employer shall:

**4.2.1.142.2.1** Ensure that a RA is conducted on WSH risks **including to mental well-being** associated with any activity **or exposure** in the workplace. **This should include considerations for its preparedness for terrorism threats at the workplaces and, disease outbreaks;**

**4.2.1.24.2.2** Take all reasonably practicable steps to eliminate any foreseeable **risks** to any person.

**4.2.2.1** Ensure that a RA is conducted on WSH risks **including to mental well-being, associated with any activity or exposure in the workplace. This should include considerations for its preparedness for terrorism threats at the workplaces and, disease outbreaks.**

# SAMPLE CHANGES

## ALIGN LANGUAGE TO RM REGULATIONS

**4.2.2.12** Review and, if **necessary**, revise the RA **;**

- 4.2.1.12.** at least once **every** three years from the RA approval date **;** or
- upon **any accident, incident, near-miss or dangerous** occurrence **of any bodily injury to any person as a result of exposure to a hazard in the workplace; or**
- when** there is **any** significant change in work **practices or procedures; or**
- where there is a significant change in the workers' personal health (including mental well-being) in relation to safety critical work process or activity; or**
- when new information on WSH emerging risks, threat of terrorism, disease outbreak, or mental well-being is made known.**

RM Regulations

Mental Well-being,  
TWSH

Terrorism,  
Disease Outbreaks, Mental Well-being

RM Regulations

- 4.2.2.12** Review and, if **heressary**, revise the RA **;**
- at least once **every** three years from the RA approval date **;** or
  - upon the occurrence **of any bodily injury to any person as a result of exposure to a hazard in the workplace; or**
  - where** there is **a** significant change in work **practices or procedures; or**
  - where there is a significant change in the workers' personal health (including mental well-being) in relation to safety critical work process or activity; or**
  - when new information on WSH emerging risks, threat of terrorism, disease outbreak, or mental well-being is made known.**

## SAMPLE CHANGES

### NON-TERRORISM SCENARIOS, DISEASE OUTBREAKS, AND MENTAL WELL-BEING

#### 5.1.2 Risk Management Team Leader

- 5.1.2.1 The RM Team Leader should be competent for the task. Basic competency can be attained ~~throughby~~ completing a Workforce Skills Qualification (WSQ) RM course approved by SkillsFuture Singapore (SSG) and conducted by ~~Workforce Development Authority (WDA) Approved~~ SSG WSQ Training Organisation (ATO) Providers, or equivalent.

Non-Focal Area

#### 5.1.2 Risk Management Team Leader

- 5.1.2.1 The RM Team Leader should be competent for the task. Basic competency can be attained by completing a Workforce Skills Qualification (WSQ) RM course approved by SkillsFuture Singapore (SSG) and conducted by SSG WSQ Training Providers or equivalent.

## SAMPLE CHANGES

### ADJACENT CONSIDERATIONS

#### 5.3 Gather Relevant Information

- 5.3.1 Once the extent of the RA is determined, relevant information should be gathered. These sources of information may include, but are not limited to:

- workplace layout plan;  
...
- medical condition (e.g., allergy), mental well-being indicators such as from survey instruments like iWorkHealth and personal health indicators of employees in relation to safety critical work processes, or activity being assessed. Do comply with prevailing national and company requirements when handling personal information;
- past training records of employees;
- information regarding the workplace's preparedness for terrorism threats (e.g., Crisis reporting process), and for disease outbreak scenarios (e.g., Temperature scanning processes, Split-team arrangements, Work from Home guidance (WFH), entry/ exit controls.)

PDPA

## SAMPLE CHANGES

### ALIGN LANGUAGE WITHIN RMCP

#### 6.1 General Requirements

- 6.1.1 The steps in RA, namely, Hazard Identification, Risk Evaluation and Risk Control, specify the RA methodology and requirements of this CP.

- 6.1.4 All RA entries ~~shall~~ be reviewed ~~and, if necessary, revised~~:

- at least once every three years from the last RA approval date; or
- upon the occurrence of any bodily injury to any person as a result of exposure to a hazard in the workplace; or
- where there is a significant change in work practices, or procedures; or
- where there is a significant change in the workers' personal health (including mental well-being) in relation to safety critical work process or activity; or
- when new information on WSH emerging risks, threat of terrorism, disease outbreak, or mental well-being is made known;

Employer #4.2.2.12  
vs  
General #6.1.4

- 6.1.5 Regarding the workplace's threat of terrorism and disease outbreaks, the Occupier should consider verified new information (e.g., new modality of attack, disease outbreak information from trusted sources) in reviewing the RA.

## SAMPLE CHANGES

### NON- TERRORISM SCENARIOS, DISEASE OUTBREAKS, AND MENTAL WELL-BEING

#### 6.3 Hazard Identification

##### 6.3.1 General

6.3.1.1 The RA Team Leader **has to should** determine the most appropriate way(s) of identifying hazards. These may include brainstorming, systematic process reviews, Process Hazard Analysis (PHA), Job Observations and Job Safety Analysis (JSA).

6.3.1.2 When identifying hazards, the RA Team **has to should** consider if the hazards could cause harm beyond the immediate area of their work.

##### 6.3.2 Process

6.3.2.1 Select a "Work Activity" from the "Inventory of Work Activities" form (see Appendix A) and place it in the "Risk Assessment Form" (see Appendix B) for analysis. Variations of these forms can be used, however, all information required in the **forms has to form should** be documented.

6.3.2.2 Break down work activity into its sub-activities to facilitate the identification of all foreseeable hazards associated with the work. These sub-activities constitute the different steps that make up the work activity.

6.3.2.3 For each sub-activity, identify the **potential** hazard(s) and record them in the "Hazard" column. List each hazard in a separate row in the table.

Non-Focal Area

## SAMPLE CHANGES

### OTHER MIX CHANGES

##### 6.3.2 Process

6.3.2.1 Select a "Work Activity" from the "Inventory of Work Activities" form (see Appendix A) and place it in the "Risk Assessment Form" (see Appendix B) for analysis. Variations of these forms can be used, however,

...

6.3.2.4 The following categories of hazards should be considered:

- physical (e.g., fire, noise, ergonomics, heat, radiation);
- mechanical (e.g., moving parts, rotating parts);
- electrical (e.g., voltage, current, static charge, magnetic fields);
- chemical (e.g., flammables, toxics, corrosives, reactive materials);
- biological (e.g., **bacteria, fungi**, blood-borne pathogens, virus, **microbial toxins**); and
- psychosocial (e.g., **employees' poor mental well-being**, stress, fatigue).

**Risks associated with terrorism threats, disease outbreak (e.g., epidemics, pandemics), and mental well-being should also be considered in the RA.**

## SAMPLE CHANGES

### GUIDE TO SEVERITY RATING - SEVERITY DESCRIPTIONS

| Level | Severity     | Description  |
|-------|--------------|--|
| 5     | Catastrophic | Death, fatal <b>occupational disease or exposure</b> , or multiple major injuries.   |
| 4     | Major        | Serious injuries, <b>serious occupational diseases or exposure</b> (includes amputations, major fractures, multiple injuries, occupational cancers, <b>diagnosed mental illnesses</b> , acute poisoning, disabilities, and <b>noise-induced hearing loss</b> ). <b>vs "deafness"</b> |
| 3     | Moderate     | Injury or ill-health <b>(including mental well-being)</b> requiring medical treatment (includes lacerations, burns, sprains, minor fractures, <b>psychosocial stress</b> , dermatitis, and work-related <b>musculoskeletal disorders</b> ). <b>vs "upper limb"</b>                   |
| 2     | Minor        | Injury or ill-health <b>(including mental well-being)</b> requiring first-aid only (includes minor cuts and bruises, irritation, ill-health with temporary discomfort, <b>fatigue</b> ).   |
| 1     | Negligible   | Negligible injury.   |

Table 4: A guide to severity rating.

## Appendix C: Hierarchy of Control

## SAMPLE CHANGES

### HIERARCHY OF CONTROL EXAMPLES - TERRORISM SCENARIOS, DISEASE OUTBREAKS, AND MENTAL WELL-BEING

#### Elimination

Elimination of risk refers to the total removal of the worker's exposure to the hazards, effectively making all identified work-related accidents, incidents and ill-health related to the specific hazard impossible. This is a permanent solution and should be attempted first as recommended in the hierarchy. Once the risk is eliminated, the item does not appear in subsequent RA forms. For example, sharp edges can be eliminated in a store or work area. For threat of terrorism, the hazard of vehicle ramming along kerbside employee pick-up point may be eliminated by relocating the pick-up waiting area away from the main road. For the risk of infectious disease transmission in the workplace, it can be eliminated by having the infrastructure and processes to implement full Work from Home.

#### Substitution

This involves substituting a process or product with a less hazardous process or product to mitigate the risk, for example, using water-based paint instead of solvent-based paint. For threat of terrorism, the hazard of theft of dangerous substances with the intention to cause human harm, it may be mitigated by substituting the dangerous substances with less harmful substances. For instance, 30% hydrogen peroxide may be substituted with 20% hydrogen peroxide. Preparations and solutions containing not more than 20%, weight in weight, of hydrogen peroxide are not regulated as Explosive Precursors.

## Appendix G: Examples relating to Possible Terrorism Scenarios

LAW ...

RISK  
MANAGEMENT  
REGULATIONS

MOVING UP THE HIERARCHY  
... ELIMINATE THE HAZARD

MOVING UP THE HIERARCHY ... ELIMINATE THE HAZARD

TRUE OR FALSE ...

To **first consider**  
elimination of hazard  
is a  
**requirement of the law.**

MOVING UP THE HIERARCHY ... ELIMINATE THE HAZARD

WSH (RISK MANAGEMENT) REGULATIONS  
REGULATION 4

**Elimination and control of risk**

4.—(1) In every workplace, the employer, self-employed person and principal shall take all reasonably practicable steps to eliminate any foreseeable risk to any person who may be affected by his undertaking in the workplace.

(2) Where it is not reasonably practicable to eliminate the risk referred to in paragraph (1), the employer, self-employed person or principal shall implement —

- (a) such reasonably practicable measures to minimise the risk; and
- (b) such safe work procedures to control the risk.

## WSH (RISK MANAGEMENT) REGULATIONS

### REGULATION 4

**To first consider  
elimination of hazard -  
is it a requirement of the law?**

(2) Where it is not reasonably practicable to eliminate the risk referred to in paragraph (1), the employer, self-employed person or principal shall implement —

- (a) such reasonably practicable measures to minimise the risk; and
- (b) such safe work procedures to control the risk.

(3) The measures referred to in paragraph (2)(a) may include all or any of the following:

- (a) substitution;
- (b) engineering control;
- (c) administrative control;
- (d) provision and use of suitable personal protective equipment.

PAGE 30

### Appendix C: Hierarchy of Control

#### Elimination

Elimination of risk refers to the total removal of the worker's exposure to the hazards, effectively making all identified work-related accidents, incidents and ill-health related to the specific hazard impossible. This is a permanent solution and should be attempted first as recommended in the hierarchy. Once the risk is eliminated, the item does not appear in subsequent RA forms. For example, sharp edges can be eliminated in a store or work area. For threat of terrorism, the hazard of vehicle ramming into employee pick-up point may be eliminated by relocating the pick-up waiting area away from the main road. For the risk of infectious disease transmission in the workplace, it can be eliminated by redesigning the infrastructure and processes to implement full WFH (Work from Home).
